## **2009-12 Tentative Major Construction Projects 2009/10 – 2011/12**

### **Provincial Highway Projects**

- Provincial Highway Construction & Rehabilitation
- North/South Trade Corridor
- Ring Roads in Edmonton and Calgary

### **Provincial Water Management Projects**

The attached tentative three-year construction and rehabilitation program lists the major projects where substantive work is anticipated to be complete or undertaken between 2009/10 and 2011/12.

- Projects that are under contract or tendered are identified stating the year of construction.
- Other projects are being designed, rights of way being negotiated and the acquisition of permits underway. These projects will commence as planned in the 3 year program dependant upon the timely completion of the design, and availability of budget.
- Minor changes to the program may be required as newer information becomes available, In particular, final paving, pavement overlays and bridge rehabilitation may be added and/or deleted from the program depending on how the roadway or bridge condition changes throughout the year.

Not identified in the program are some of the bridge rehabilitation projects and localized improvements such as minor slide repairs and intersection upgrades; small carry-over projects from 2008/09; and general expenditures such as chip seal coats, lighting, preliminary (consultant) engineering and future right-of-way. Additionally, minor safety-related improvements might be added as identified, generally in conjunction with larger projects.
