BF 07567 Local Road Over Strawberry Ck
Hydrotechnical Summary

Channel Capacity :

S = 0.0008
B = 8 m, h = 4.0 m, T_h = 18 m
Use n = 0.04

At Bank Height : Y = 4.0 m, V = 1.3 m/s, Q = 65 cms
At Channel Capacity : Y = 5.0 m, V = 1.6 m/s, Q = 115 cms

Historical Highwater Data :

HW was noted in 1961 (Y = 4.3m, possible overflow from Swan River) and 1988 (drift jammed close to the girders, Y ~ 5m u/s).

There are no WSC gauges on this stream. Nearby gauges suggest HW events in 1917, 1983, 1988, and 1996. The largest storm in the storm database for this area is July 1988 (140mm) with other large storms in 1961, 1979, 1983, 1993 and 1996.

Basin Runoff Potential :

d = 75mm, T_p = 20hrs, use q = 1.1 cms/km^2.
Gross DA = 140 km^2.
Q_p = 150cms.

Conclusion :

The channel capacity estimate is consistent with historic highwater observations and is within the basin runoff potential.

Recommended parameters : Y = 5.0 m, V = 1.6 m/s, Q = 115 cms.
