BF 71910 Local Road Over Stony Ck
Hydrotechnical Summary

Channel Capacity :

S = 0.001
B = 5 m, h = 1.4 m, T_h = 9 m
Use n = 0.045

At Bank Height : Y = 1.5 m, V = 0.7 m/s, Q = 8 cms
At Channel Capacity : Y = 2.3 m, V = 1.0 m/s, Q = 18 cms

Historical Highwater Data :

The 1982 design was based on Y = 2.5m and Q = 20cms.

WSC gauge 05ED001 (DA = 540 km^2, 1973 to 1976) reports Q = 14cms in April 1974. Other gauges in the area suggest HW events in April of 1971, 1974, 1979, and 1997, as well as June 1978 and July 1986. The storm database shows 100mm in June 1973.

Basin Runoff Potential :

d = 40mm, T_p = 20 hrs, q = 0.55 cms/km^2.
Gross DA = 136 km^2.
Q_p = 75 cms.

Conclusion :

The channel capacity estimate is consistent with historic observations and is within the basin runoff potential.

Recommended parameters : Y = 2.3 m, V = 1.0 m/s, Q = 18 cms.
