

ACKNOWLEDGEMENTS

This design guide was prepared under the direction of the Highway Geometric Design Guide Advisory Group, Alberta Transportation. The committee includes members from the department representing various functional areas related to highways, such as Design, Planning, Highway Operations, Bridge Engineering and Regional Transportation. Chapter development was completed by individual chapter subcommittees which researched and prepared recommendations for various topics such as roadway classification, design designation, alignment and superelevation, active modes, intersection and interchange elements, access management and many more. External support provided by the Highway Geometric Design Guide Task Group which is comprised of volunteers from the Consulting Engineers of Alberta.
