Performing Organization Name and Address Stantec Consulting Ltd. 10160 – 112 Street Edmonton, Alberta T5K 2L6		Sponsoring Agency Name and Address Association of Drilling Fluid Transportation Contractors Swift Current, Saskatchewan S9H 4X6 Alberta Transportation and Utilities Transport Engineering 4920 – 51 Street Red Deer, AB T4N 6K8	
Supplementary Notes			
Abstract For access onto agricultural lands, vacuum trucks are often equipped with flotation tires to reduce rutting and compaction of the soil. These tires are not deemed to comply with the province's public road regulations and the current study addresses the technical merits of permitting flotation tires for highway travel. The study began with a collection and review of current practices and information on the subject tires, field investigations of road and soil damages, and ended with recommendations for permit policies governing the use of flotation tires. Operating speeds, weight limits and tire specifications are some of the key recommended conditions for granting any highway permits. (written by A.L.)			
Key Words Flotation tire Off-highway Vacuum truck		Distribution unlimited	Project Co-ordinator Alvin Moroz
