Vehicle & Rail Safety Branch**

**A Technical Publication from
ALBERTA EDGE (ENVIRONMENTAL AND
DANGEROUS GOODS EMERGENCIES)**

**A Guide to the
Transportation of
Dangerous Goods
Regulations**

September 2018

Alberta 

This material is meant as a guide to certain parts of the Transportation of Dangerous Goods Regulations and is not meant to be a substitute for them. It is the responsibility of handlers, offerers and transporters of dangerous goods to consult the Regulations for the exact requirements. Alberta EDGE (Environmental and Dangerous Goods Emergencies) of Alberta Transportation can provide accurate information regarding the Regulations 24 hours a day.

Alberta EDGE (Environmental and Dangerous Goods Emergencies)

**Alberta Transportation
Dangerous Goods and Rail Safety
Main Floor, Twin Atria Building
4999 – 98 Avenue
Edmonton, Alberta, T6B 2X3**

INTRODUCTION

The purpose of the Transportation of Dangerous Goods Regulations is to promote safety in handling, offering for transport and transporting of dangerous goods.

The Dangerous Goods and Rail Safety Section of Alberta Transportation has the responsibility of administering the legislation for those areas which are provincial responsibility. In order to assist manufacturers, importers, shippers and carriers with the legislation, the Dangerous Goods and Rail Safety Section has a 24 hour, seven day emergency and information centre, which is Alberta EDGE, and they can be reached at 780-422-9600 in Edmonton or toll free 1-800-272-9600 for the remainder of Alberta.

If you require a copy of the TDG Regulations, it can be obtained in electronic format from the dangerous goods website of Transport Canada. The address is:

<http://www.tc.gc.ca/tdg>

1. CLASSIFICATION AND CHARACTERISTICS OF DANGEROUS GOODS

The TDG Regulations divide dangerous goods into 9 classes according to the type of hazard they present. Some of these are divided into divisions due to the nature and characteristic of the substances.

Table 1

Class	Division	Characteristics of Dangerous Goods
1 Explosives (Sections 2.9 – 2.12)	1.1	A substance or article with a mass explosion hazard
	1.2	A substance or article with a projection hazard but not a mass explosion hazard
	1.3	A substance or article which has a fire hazard and either a minor blast hazard or a minor projection hazard or both, but does not have a mass explosion hazard
	1.4	A substance or article which presents no significant hazard beyond the package in the event of ignition or initiation during transport
	1.5	A very insensitive substance with a mass explosion hazard
	1.6	Extremely insensitive article with no mass explosion hazard
2 Gases (Sections 2.13 – 2.17)	2.1	A flammable gas which is easily ignited and burns
	2.2	A non-flammable, non-toxic, non-corrosive gas
	2.3	A toxic gas
3 Flammable Liquids (Sections 2.18 – 2.19)	None	A flammable liquid with a closed-cup flash point less than or equal to 60.0° C
4 Flammable Solids (Sections 2.20 – 2.22)	4.1	A flammable solid which is readily combustible and may cause fire through friction or from heat retained from manufacturing
	4.2	A spontaneously combustible substance that ignites when exposed to air
	4.3	A water-reactive substance which emits flammable gas when it comes into contact with water

Class	Division	Characteristics of Dangerous Goods
5 Oxidizing Substances, Organic Peroxides (sections 2.23 – 2.25)	5.1	An oxidizing substance which may yield oxygen and contribute to the combustion of other material
	5.2	An organic peroxide which releases oxygen readily and may be liable to explosive decomposition, or sensitive to heat, shock or friction
6 Toxic and Infectious Substances (sections 2.26 – 2.36)	6.1	A toxic substance that is liable to cause harm to human health
	6.2	An infectious substance
7 Radioactive Materials (sections 2.37 – 2.39)	None	Radioactive materials as defined in the Packaging and Transport of Nuclear Substance Regulations.
8 Corrosive Substances (sections 2.40 – 2.42)	None	Solids or liquids such as acids or alkali materials that cause destruction of the skin or corrode metals
9 Miscellaneous Products, Substances or Organisms (sections 2.43 – 2.45)	None	A regulated substance that cannot be assigned to any other class. It includes genetically modified micro-organisms, marine pollutants and substances transported at elevated temperatures.

In addition to the class and division, some dangerous goods are also assigned packing groups. These groups reflect the level of hazard that dangerous goods represent.

Packing Group	Level of Hazard
I	Very hazardous substances
II	Hazardous substances
III	Moderately hazardous substances

The assignment of packing groups is done according to chemical and physical testing requirements outlined for each class of dangerous goods in Part 2 of the TDG Regulations.

2. DOCUMENTATION

Consignor Responsibilities

A consignor is defined as a person in Canada who is named in the shipping document as the consignor; imports or who will import dangerous goods into Canada; or if the previous do not apply, has possession of dangerous goods immediately before they are in transport. It is the responsibility of the consignor to prepare and give a shipping document to the carrier or an electronic copy, if the carrier agrees. If the consignor is an importer of dangerous goods then he or she must make sure that the carrier has a shipping document prior to the dangerous goods being transported in Canada [Section 3.1].

Carrier Responsibilities

A carrier is defined as a person who, whether or not for hire or reward has possession of dangerous goods while they are in transport. A carrier must not take possession of a shipment of dangerous goods unless they have a shipping document for the dangerous goods. If the carrier accepts an electronic copy of a shipping document then they must produce a paper copy to carry with the shipment [Section 3.2].

If the dangerous goods are passed to another person, the carrier must provide a copy of the shipping document to that other person who could be another carrier or the consignee (final receiver) of the dangerous goods.

Location of Shipping Document

The driver of a power unit must ensure that a copy of the shipping document is kept in a pocket mounted on the driver's door, or within the driver's reach. If the driver leaves the power unit he or she must place the document in the door pocket, on the driver's seat or on a location that is clearly visible to anyone entering the power unit through the driver's door [Section 3.7]

After unloading a shipment of dangerous goods or disconnecting a cargo unit (for example, a trailer) from a power unit, the carrier must place the shipping document in a waterproof receptacle attached to or near the means of containment containing the dangerous goods. This is necessary if the shipment is left in an unsupervised area or possession of the dangerous goods has not been transferred to another person [Section 3.10].

Information on the Shipping Document

According to Section 1.4 of the Transportation of Dangerous Goods Regulations, the definition of the shipping document must be in paper format, electronic format is not acceptable. The information on a shipping document must be easy to identify, legible and printed in indelible ink. The shipping document may be prepared in English or in French [Section 3.4]. The table below describes the minimum required information that must appear on a shipping document.

A shipping document template is included at the end of this bulletin.

The following is the minimum required information that must appear on a shipping document:

Shipping Document Information	When Required	Where in The Regulations
Date	Always	3.5(1)(b)
Name and address of consignor	Always	3.5(1)(a)
Description of goods in the following order		
a. UN number	Always	3.5(1)(c)(i)
b. Shipping name	Always	3.5(1)(c)(ii)
c. The technical name of the most dangerous substance related to the primary classification	If Provision 16 of Schedule 2 applies	3.5(1)(c)(ii)(A)
d. The words "Not Odorized"	For liquefied petroleum gas that has not been odorized	3.5(1)(c)(ii)(B)
e. Primary classification	Always	3.5(1)(c)(iii)
f. Compatibility group	For Class 1	3.5(1)(c)(iv)
g. Subsidiary classifications	If Any	3.5(1)(c)(v)
h. Packing group	If Any	3.5(1)(c)(vi)
The words "Toxic by inhalation" or "toxic – inhalation hazard"	If Provision 23 of Schedule 2 applies	3.5(1)(c)(vii)
The quantity in the International System of Units (SI) for each shipping name ^{1, 2}	Always	3.5(1)(d)
The net explosive quantity	For Class 1 as per Provision 85 and 86 of Schedule 2	3.5(1)(d)
The number of containers ²	For dangerous goods in small containers requiring safety labels	3.5(1)(e)
The words "24-Hour Number" followed by a telephone number where the consignor can easily be reached ³	Always	3.5(1)(f)
Consignor's Certification ⁴	Always	3.6.1
Emergency Response Assistance Plan (ERAP) number and telephone number to	If Required	3.6(1)

activate it		
The control and emergency temperatures	For products in Classes 4.1 and 5.2	3.6(3)
The words “Fumigated Unit”	As required	3.5(3)
Additional information for Class 7 ⁵	As required	3.6(3)(d)

Note:

1. If the quantity of dangerous goods is less than 10% of the container’s maximum fill limit then the words “Residue – Last Contained” followed by the shipping name of the dangerous goods last contained in the means of containment may be used to describe the quantity. This does not apply to Class 2 gases in small containers and Class 7 radioactive substances [Section 3.5(4)].
2. Multiple Deliveries: If the quantity of dangerous goods or the number of small means of containment changes during transport, the carrier must show the change on the shipping document or on a document attached to the shipping document. [Section 3.5(5)].
3. The telephone number of someone who is not the consignor, but who is competent to give technical information on the shipment, such as CANUTEC, may be used instead. To use CANUTEC’s phone number, the consignor must receive permission, in writing, from CANUTEC. A consignor who uses the telephone number of an organization or agency other than CANUTEC must ensure that the organization or agency has current, accurate information on the dangerous goods the consignor offers for transport and, if the organization or agency is located outside Canada, the telephone number must include the country code and, if required, the city code [Section 3.5 (2)].
4. Consignor’s Certification: “I hereby declare that the contents of this consignment are fully and accurately described above by the proper shipping name, are properly classified and packaged, have dangerous goods safety marks affixed or displayed on them, and are in all respects in proper condition for transport according to the Transportation of Dangerous Goods Regulations.” (Section 3.6.1)
5. Additional requirements can be found in “Packaging and Transport of Nuclear Substances Regulation”

Radioactive materials have special documentation requirements. Dangerous goods shipped by air must be documented in a prescribed form known as "Shipper’s Declaration for Dangerous Goods". For details of alternate and additional documentation requirements, consult Part 3 of the TDG Regulations or call Alberta EDGE at 1-800-272-9600.

Waste Manifest

A waste manifest or recycling docket produced by Alberta Environment and Parks is an acceptable dangerous goods shipping document, as it contains all the requirements listed in Section 3.5 of the TDG Regulations.

A waste manifest or recycling docket is used when shipping a dangerous good that is no longer in its original form and is intended for treatment, disposal or recycling. These forms are serialized pre-printed forms which are only available through government offices. In order to obtain these documents, please call Alberta Environment and Parks at (780) 427-0666 (for a toll free call in Alberta dial 310-0000).

Oilfield Waste Manifest

When shipping oilfield production wastes a special waste manifest is used. This document was developed by the Alberta Energy Regulator (AER) and meets the requirements for a waste manifest as specified by Alberta Environment. This document is similar to the waste manifest described previously but uses a different waste tracking system.

For information, contact the Alberta Energy Regulator (AER) Customer Contact Centre at 1-855-297-8311.

3. SAFETY MARKS

Safety marks are the placards, labels and package markings, which identify dangerous goods shipments. Anyone who offers for transport, transports or imports a means of containment that contains dangerous goods must display the safety marks required by the TDG Regulations [Section 4.1].

A person must not display a safety mark on a means of containment if that safety mark is misleading as to the contents or potential danger [Section 4.2].

A person must not load or pack dangerous goods into a large means of containment unless the means of containment displays the safety marks required before the dangerous goods are loaded [Section 4.3].

The **consignor** (shipper) must ensure that each package of dangerous goods is properly labeled and marked and that all necessary placards are provided. It is the consignor's responsibility to provide the safety marks to the carrier [Section 4.4].

The **carrier** is responsible for displaying the required safety marks on the large means of containment and ensuring that the required safety marks remain displayed on the small means of containment and the large means of containment. The carrier must also provide, display or remove the safety marks if the requirements for them change while in transport. [Section 4.5].

GENERAL FEATURES OF ALL SAFETY MARKS

All safety marks must be:

- visible and legible;
- displayed against a background of contrasting colour;
- made of durable, weather-resistant material; and
- displayed in colours specified in the Pantone® "Formula Guide", the Part 172 of CFR 49 or Chapters 5.2 and 5.3 of the UN Dangerous Goods Recommendations [Section 4.6].

Small Means of Containment

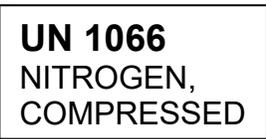

There is a specific set of labels representing the various hazards defined by the TDG Regulations. They are applied to the outer surface of small means of containment (**capacity less than or equal to 450 L**). These labels can be used to represent both a primary hazard (the primary class) and a secondary hazard (the subsidiary class) of a dangerous good.

Standard labels must have dimensions of not less than **100 mm** on each side with a solid border line **5 mm** inside the edge. If the small means of containment has an irregular shape or is too small, a label can be reduced in size but it must not be reduced to less than **30 mm** [Subsection 4.7(2)]. If a 30 mm label will not fit on a small means of containment, it can be displayed on a **tag** attached to the means of containment [Subsection 4.10(4)].

One label must be displayed on a small means of containment for the **primary class** and one for each **subsidiary class** of a dangerous good [Subsection 4.10(1)].

If a small means of containment is placed inside another, and the outer container is not opened during loading, transport or unloading, then the label is required to be displayed only on the outer small means of containment [Paragraph 4.10(1)(a)].

The **UN Number** must also be displayed either within a white rectangle located on the primary class label itself or next to the primary class label [Section 4.8(a) and Section 4.12(1)]. When the primary class label for dangerous goods in transport is displayed on a tag, the UN number must also be displayed on the tag on or next to the primary class label [Section 4.12(2)]. If the UN number is displayed on the label itself, the letters "UN" must not be displayed with the number [Section 4.8(1)(b)].

Example of Safety Marks for a Small Means of Containment	
In this case the product is compressed nitrogen	
	
	
Class 2.2 safety label is green with a white cylinder symbol	

When a small means of containment is inside an overpack and a safety mark is required by Part 4 of the Transportation of Dangerous Goods Regulations, the **person who prepares the overpack** must display the word the word "**Overpack**" on at least one side of the overpack, the information required by subsection 4.10.1(3) on **one side** of the overpack, if its capacity is **less than 1.8 m³ (64 cubic feet)**, and the information required by subsection 4.10.1(3) on **two opposite sides** of the overpack, if its capacity is **greater than or equal to 1.8 m³ (64 cubic feet)** [Subsection 4.10.1(1)].

When dangerous goods included in Class 7, Radioactive Materials, are transported in an overpack and a label is required to be displayed by Part 4 of the Transportation of Dangerous Goods Regulations, the overpack must be prepared in accordance with section 16(4) of the "Packaging and Transport of Nuclear Substances Regulations" [Subsection 4.10.1(4)].

When a label is required by Part 4 of the Transportation of Dangerous Goods Regulations to be displayed on a small means of containment that is inside a consolidation bin, an indication of each class of dangerous goods contained in the consolidation bin must be clearly and legibly displayed on the consolidation bin. It can either be a **tag** or a **fixed display device** (white board or a simple piece of paper) that will be updated every time a dangerous good is removed or added (Section 4.10.2).

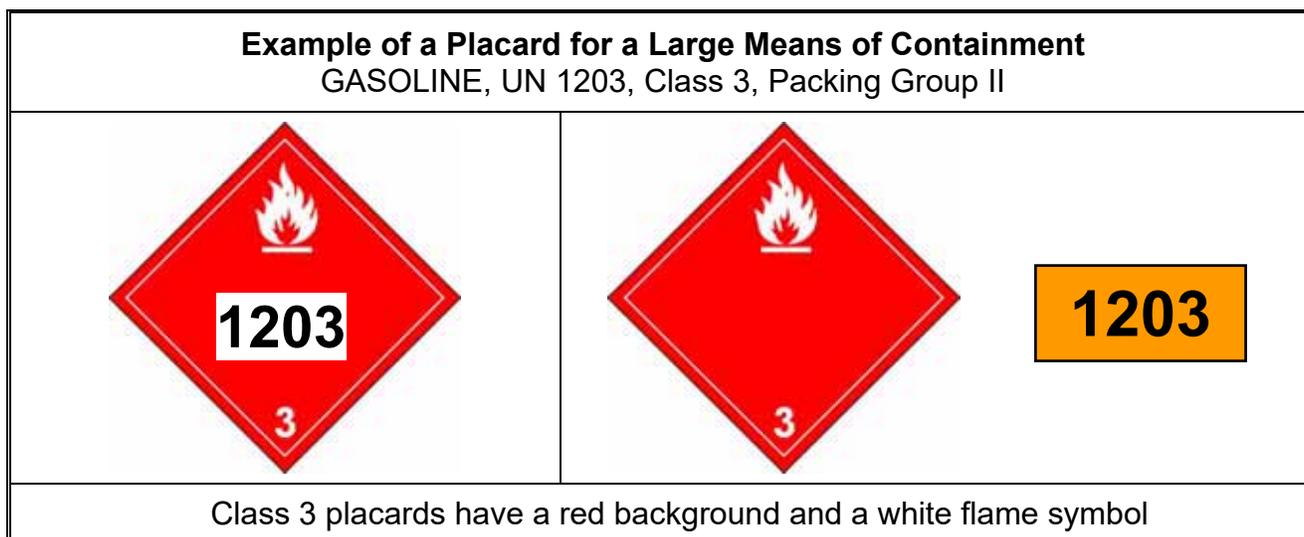

For details on labelling, please consult the "Safety Mark" bulletin published by Dangerous Goods and Rail Safety.

Large Means of Containment

A large means of containment has a capacity greater than 450 litres. Placards representing the various chemical hazards are placed on all four sides of large means of containment or transport units. Placards can be used to represent both the primary and the subsidiary class of the dangerous goods in transport.

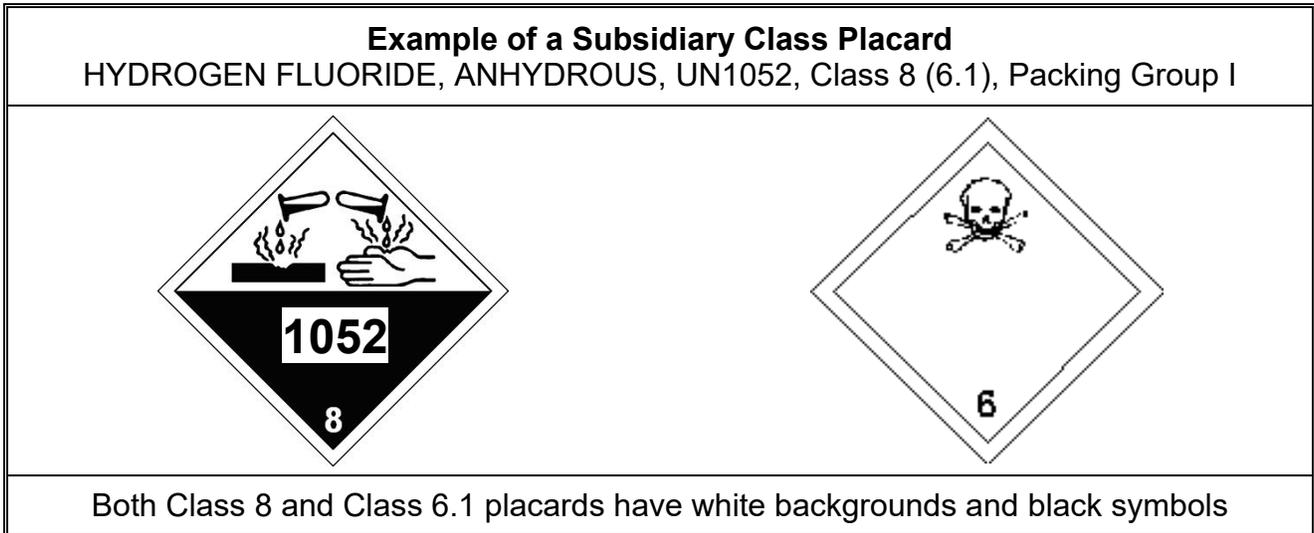

Each side of a placard must be at least 250 mm in length. Except for the DANGER placard, all placards have a line running 12.5 mm inside the edge. If the large means of containment has an irregular shape or its size is too small, the placard can be reduced in size but the dimensions must never be less than 100 mm on each side [Section 4.7(3)].

The UN number must be displayed in the centre of the placard or on an orange panel next to the placard in black numerals not less than 65 mm high. The letters “UN” are not displayed. [Subsection 4.8(2)].

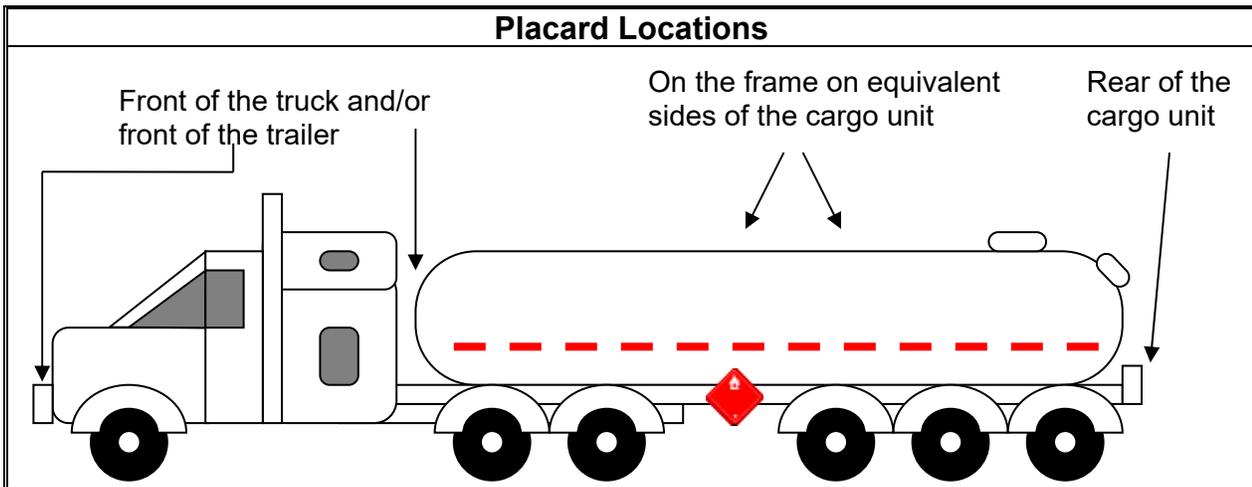

A **subsidiary class placard** must also be displayed on each side and each end of a large means of containment for dangerous goods for which an ERAP is required and that have a subsidiary classification of:

- Class 1: the placard will be the same as for Classes 1.1, 1.2 and 1.3.
- Class 4.3.
- Class 6.1, in Packing Group I.
- Class 8, and the UN number is UN2977 and UN2978 (both these products are uranium hexafluoride radioactives), the placard will be the same as for Class 8 [Section 4.15.1].

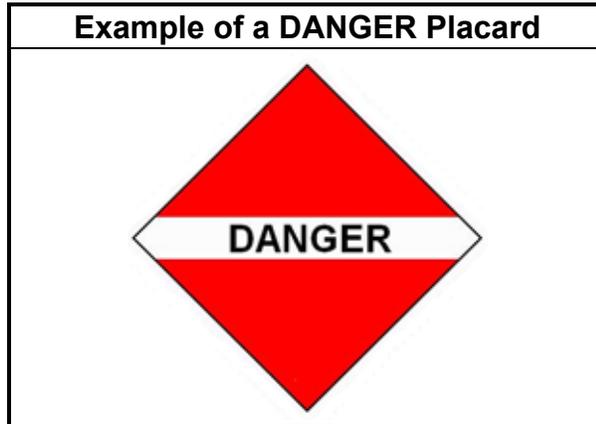

A placard, or a placard and UN number, must be displayed on each side and on each end of a large means of containment except in the case of a large means of containment that is permanently connected to a frame. Placards may be displayed on the **frame** if the resulting position of the placard, or the placard and UN number, is equivalent on each side and on each end of the means of containment. In the case of a large means of containment that is a trailer unit, the placard, or the placard and UN number, may also be displayed on the **front of the vehicle** that is attached to the trailer unit rather than on the leading end of the trailer unit. The placards must be displayed on all four sides of a large means of containment [Section 4.15.3], and must be visible, legible and displayed against a background of contrasting colour [Section 4.6].

When dangerous goods included in different primary classes are transported in different compartments of a compartmentalized large means of containment, the primary class placard and the UN number for the dangerous goods in each compartment must be displayed on each side of that compartment and each placard and UN number must be displayed on each end of the compartmentalized large means of containment but each specific placard need only be displayed once on each end [Section 4.19(1)].

DANGER PLACARD

The display of a DANGER placard is **not mandatory but it is permitted** to be displayed on a large means of containment instead of any other placard if the large means of containment contains two or more dangerous goods that require different placards and the dangerous goods loaded into the large means of containment are contained in two or more small means of containment [Section 4.16 (1)].

The DANGER placard must **not** be displayed on a large means of containment for [Section 4.16 (2)]:

- (a) Dangerous goods that have a gross mass greater than 1 000 kg, are included in the same class and are offered for transport by one consignor.
- (b) Dangerous goods that require an Emergency Response Assistance Plan (ERAP).
- (c) Dangerous goods included in Class 1, Explosives.
- (d) Dangerous goods included in Class 2.3, Toxic Gases.
- (e) Dangerous goods included in Class 4.3, Water-reactive Substances.
- (f) Dangerous goods included in Class 5.2, Organic Peroxides, Type B, liquid or solid, that require a control or emergency temperature.
- (g) Dangerous goods included in Class 6.1, Toxic Substances, subject to Special Provision 23. (Refer to Pages 7 and 8)
- (h) Dangerous goods included in Class 7, Radioactive Materials, that require a Category III – Yellow label [Subsection 4.16(2)].

Orientation of Labels and Placards

Labels and placards must be displayed “square on a point”. That is, resting on a corner rather than on a side [Section 4.7(1)]. The example below shows the proper orientation.

Safety Mark Orientation	
Correct	Incorrect
	

For details on safety marks, please consult the “Safety Mark” bulletin published by Dangerous Goods and Rail Safety.

4. TRAINING

Anyone who handles, offers for transport or transports dangerous goods must be adequately trained and have a valid Dangerous Goods Training Certificate or must be in the presence of and under the direct supervision of a trained person.[Section 6.1].

A person is adequately trained if the person has sound knowledge of the topics listed below that relate directly to the person's duties [Section 6.2]:

- (a) the classification criteria and test methods in Part 2, Classification;
- (b) shipping names;
- (c) the use of Schedules 1, 2 and 3;
- (d) the shipping document and train consist requirements in Part 3, Documentation;
- (e) the dangerous goods safety marks requirements in Part 4, Dangerous Goods Safety Marks;
- (f) the certification safety marks requirements, safety requirements and safety standards in Part 5, Means of Containment;
- (g) the emergency response assistance plan requirements in Part 7, Emergency Response Assistance Plan;
- (h) the report requirements in Part 8, Accidental Release and Imminent Accidental Release Report Requirements;
- (i) safe handling and transportation practices for dangerous goods, including the characteristics of the dangerous goods;
- (j) the proper use of any equipment used to handle or transport the dangerous goods;
- (k) the reasonable emergency measures the person must take to reduce or eliminate any danger to public safety that results or may reasonably be expected to result from an accidental release of the dangerous goods;

The employer issues a training certificate when he/she has reasonable grounds to believe that an employee possesses adequate training. The training certificate may be in paper or electronic format. A training certificate must have the following information [Section 6.3(1)]:

- (a) the name and address of the place of business of the employer;
- (b) the employee's name;
- (c) the date the training certificate expires, preceded by the words "Expires on" or "Date d'expiration"; and
- (d) the aspects of handling, offering for transport or transporting dangerous goods for which the employee is trained, including the specific topics set out in section 6.2 of the TDG Regulations (see page 4 of this document).

The training certificate must be signed by the employee and by the current employer or an employee acting on the employer's behalf [Section 6.3(3)].

A self-employed person who has reasonable grounds to believe that he or she is adequately trained and who will perform duties to which the training relates must issue to himself or herself a training certificate [Section 6.3(2)]. The employer or self-employed

person must keep a record of training and a copy of a training certificate from the date the training certificate was issued until two years after it expires [Section 6.6].

The training certificate must be immediately presented to an inspector who requests it [Section 6.8].

5. REPORTING REQUIREMENTS

Any person who has the charge, management or control of the Dangerous Goods must report a release or anticipated release of dangerous goods that are being offered for transport, handled or transported by road vehicle, railway vehicle or ship as soon as possible, after a release or anticipated release. The verbal report has to be made to **any local authority** that is responsible for responding to emergencies at the location of the release or anticipated release. The report must be made if the dangerous goods are, or could be, in excess of the quantity set out in the following table **AND** if the release endangers or could endanger **Public Safety**.

Public Safety means the safety of human life and health and of property and the environment.

Section 13 of the provincial Dangerous Goods Transportation and Handling Act also requires any person who at the time **has the charge, management, or control of the means of containment** shall make a report of the occurrence or imminence of the release in the prescribed manner and containing the prescribed information to a **prescribed person**, as soon as possible in the circumstances.

Class	Packing Group or Category	Quantity
1	II	Any quantity
2	Not applicable	Any quantity
3, 4, 5, 6.1 or 8	I or II	Any quantity
3, 4, 5, 6.1 or 8	III	30 L or 30 kg
6.2	A or B	Any quantity
7	Not applicable	A level of ionizing radiation greater than the level established in section 39 of the "Packaging and Transport of Nuclear Substance Regulations, 2015"
9	II or III, or without packing group	30 L or 30 kg

Local authority (Section 8.2 of the federal TDG Regulations) or the **prescribed person** (Section 13 of the Provincial Dangerous Goods Transportation and Handling Act) who receives the dangerous goods occurrence/release include **Alberta Transportation, Dangerous Goods and Rail Safety (1-800-272-9600)** in addition to the local police (911), as per Section 5.1 of the provincial Dangerous Goods Transportation and Handling Regulation, AR 157/97.

A request of the following label can be obtained from Alberta Transportation, Dangerous Goods and Rail Safety Section:

The Emergency Report provided to the local authority referred to in Section 8.2 must include the following information:

- (a) the name and contact information of the person making the report;
- (b) the date, time and geographic location of the release; or the incident that led to the anticipated release
- (c) the mode of transport used;
- (d) the shipping name or UN number of the dangerous goods;
- (e) the quantity of dangerous goods that was in the means of containment before the release or anticipated release;
- (f) the quantity of dangerous goods estimated to have been released; and
- (g) if applicable, the type of incident leading to the release, including a collision, roll-over, derailment, overfill, fire, explosion or load-shift.

The Release or Anticipated Release Report will be required in the following situations [Section 8.4]:

- the death of a person;
- a person sustaining injuries that required immediate medical treatment by a health care provider;
- an evacuation of people or their shelter in place;
- the closure of a facility used in the loading and unloading of dangerous goods, or a road, a main railway line or a main waterway.
- a means of containment has been damaged to the extent that its integrity is compromised;
- the centre sill or stub sill of a tank car is broken or there is a crack in the metal equal to or greater than 15 cm (6 in.).

The Release or Anticipated Release Report must be made to:

- (a) CANUTEC at 1-888-CANUTEC (1-888-226-8832) or 613-996-6666;
- (b) The consignor;
- (c) In the case of dangerous goods included in Class 7, Radioactive Materials, the Canadian Nuclear Safety Commission; and

- (d) In the case of a ship, a Vessel Traffic Services Centre or a Canadian Coast Guard radio station.

Information required on the Release or Anticipated Release are [Section 8.5]:

- (a) the name and contact information of the person making the report;
- (b) in the case of a release of dangerous goods, the date, time and geographic location of the release;
- (c) in the case of an anticipated release of dangerous goods, the date, time and geographic location of the incident that led to the anticipated release;
- (d) the mode of transport used;
- (e) the shipping name or UN number of the dangerous goods;
- (f) the quantity of dangerous goods that was in the means of containment before the release or anticipated release;
- (g) in the case of a release of dangerous goods, the quantity of dangerous goods estimated to have been released;
- (h) if applicable, the type of incident leading to the release or anticipated release, including a collision, rollover, derailment, overfill, fire, explosion or load-shift;
- (i) if applicable, the name and geographic location of any road, main railway line or main waterway that was closed;
- (j) a description of the means of containment containing the dangerous goods;
- (k) if applicable, an estimate of the number of people evacuated or sheltered in place; and
- (l) if applicable, the number of deaths and the number of persons who sustained injuries that required immediate medical treatment by a health care provider.

After submitting the Release or Anticipated Release Report, the person or the person's employer, must make a follow-up report in writing to the Director General within 30 days after the day on which the report was made [Section 8.6]. The 30-Day Report must include the following information [Section 8.7].

1. the name and contact information of the person making the report;
2. the names and contact information of the consignor, consignee and carrier;
3. in the case of a release of dangerous goods, the date, time and geographic location of the release;
4. in the case of an anticipated release of dangerous goods, the date, time and geographic location of the incident that led to the anticipated release;
5. the mode of transport used;
6. the classification of the dangerous goods;
7. the quantity of dangerous goods that was in the means of containment before the release or anticipated release;
8. in the case of a release of dangerous goods, the quantity of dangerous goods estimated to have been released;
9. a description of the means of containment containing the dangerous goods;
10. if applicable, a description of any failure of or damage to the means of containment;
11. information about the events leading to the release or anticipated release of dangerous goods;
12. information as to whether there was an explosion or fire;
13. the name and geographic location of any facility used in the loading or unloading of the dangerous goods that was closed, and the duration of the closure;

14. the name and geographic location of any road, main railway line or main waterway that was closed, and the duration of the closure;
15. if applicable, an estimate of the number of people evacuated or sheltered in place and the duration of the evacuation or shelter in place;
16. if applicable, the number of deaths and the number of persons who sustained injuries that required immediate medical treatment by a health care provider;
17. if applicable, the ERAP reference number;
18. the date on which the report referred to in section 8.4 was made; and
19. an estimate of any financial loss incurred as a result of the release or anticipated release, and any emergency response cost or remediation costs related to it.

For detailed information on reporting requirements, request Alberta EDGE's information bulletin entitled Emergency, Release or Anticipated Release Report Requirements.

6. EMERGENCY RESPONSE ASSISTANCE PLAN (ERAP)

An Emergency Response Assistance Plan (ERAP) is required in instances where dangerous goods are potentially very hazardous when transported in moderate or large quantities. If a large enough amount of these dangerous goods were released, the potential for harm to people and the environment would be great. For this reason, Part 7 of the TDG Regulations requires consignors and importers of dangerous goods to register an ERAP if necessary.

An ERAP is required for the following circumstances:

- A quantity of dangerous goods having the same UN number in a single means of containment. If the quantity of dangerous goods with an ERAP index in Col. 7 of Schedule 1 exceeds the ERAP limit. [Section 7.1(1)].
- A quantity of one or more dangerous goods from one of the following classes that are in one or more means of containment If the quantity of dangerous goods exceeds the ERAP limit. [Section 7.1(2)].
 - Class 3, Flammable Liquids with a subsidiary class of 6.1, Toxic Substances
 - Class 4, Flammable Solids, liable to spontaneous combustion and water reactive.
 - Class 5.2, Organic Peroxides, that are Type B or Type C
 - Class 6.1, Toxic Substances, Packing Group I
- A quantity of dangerous goods having the same UN number contained in more than one large means of containment. If the total quantity of dangerous goods in all the containment exceeds the ERAP limit. [Section 7.1(3)].
- Class 1, Explosives, and contained in one or more means of containment if the total quantity of explosives exceeds the ERAP limit for the explosives with the lowest index number. If the quantities of explosives are expressed in net explosives quantity and number of articles, one kilogram net explosives quantity must be counted as 100 articles and each 100 articles must be counted as one kilogram net explosives quantity [Section 7.1(4)].
- Class 2, Gases, that have the same UN number, that are contained in more than one means of containment, each of which has a capacity greater than 225 L, that are a single unit as a result of being interconnected through a piping arrangement, and that are permanently mounted on a structural frame for transport if the total quantity of those dangerous goods in the interconnected means of containment exceeds the ERAP limit [Section 7.1(5)].
- Any of the following dangerous goods if the quantity of the dangerous goods by rail in the tank car exceeds 10 000 L [Section 7.1(6)]:
 - (a) UN1170, ETHANOL with more than 24% ethanol, by volume, ETHANOL SOLUTION with more than 24% ethanol, by volume, ETHYL ALCOHOL with more than 24% ethanol, by volume, or ETHYL ALCOHOL SOLUTION with more than 24% ethanol, by volume;

- (b)** UN1202, DIESEL FUEL, GAS OIL or HEATING OIL, LIGHT;
 - (c)** UN1203, GASOLINE, MOTOR SPIRIT or PETROL;
 - (d)** UN1267, PETROLEUM CRUDE OIL;
 - (e)** UN1268, PETROLEUM DISTILLATES, N.O.S., or PETROLEUM PRODUCTS, N.O.S.;
 - (f)** UN1863, FUEL, AVIATION, TURBINE ENGINE;
 - (g)** UN1987, ALCOHOLS, N.O.S.;
 - (h)** UN1993, FLAMMABLE LIQUID, N.O.S.;
 - (i)** UN3295, HYDROCARBONS, LIQUID, N.O.S.;
 - (j)** UN3475, ETHANOL AND GASOLINE MIXTURE, with more than 10% ethanol, ETHANOL AND MOTOR SPIRIT MIXTURE, with more than 10% ethanol, or ETHANOL AND PETROL MIXTURE, with more than 10% ethanol; and
 - (k)** UN3494, PETROLEUM SOUR CRUDE OIL, FLAMMABLE, TOXIC.
- Class 6.2, Infectious Substances, or any substance that exhibits characteristics similar to these substances [Section 7.1(6)].:
 - (a)** Crimean-Congo Hemorrhagic fever virus;
 - (b)** Ebola virus;
 - (c)** Foot and mouth virus cultures;
 - (d)** Guanarito virus;
 - (e)** Hendra virus;
 - (f)** Herpes B virus (Cercopithicene Herpesvirus-1) cultures;
 - (g)** Junin virus;
 - (h)** Kyasanur Forest virus;
 - (i)** Lassa virus;
 - (j)** Machupo virus;
 - (k)** Marburg virus;
 - (l)** Nipah virus;
 - (m)** Omsk hemorrhagic fever virus;
 - (n)** Russian Spring-Summer encephalitis virus;
 - (o)** Sabia virus; and
 - (p)** Variola (smallpox virus). [Section 7.1(7)].

- A quantity of dangerous goods exceeds the ERAP limit if the dangerous goods have an index number in Column 7 of Schedule 1 and
 - (a)** if a solid, have a mass that is greater than the index number when that number is expressed in kilograms;
 - (b)** if a liquid, have a volume that is greater than the index number when that number is expressed in litres;
 - (c)** if a gas, including a gas in a liquefied form, are contained in a means of containment that has a capacity greater than the index number when that number is expressed in litres; or
 - (d)** if an explosive
 - (i)** not subject to special provision 86, have a net explosives quantity that is greater than the index number when that number is expressed in kilograms, or
 - (ii)** subject to special provision 86, are in a quantity that is greater than the number of articles listed for the explosive. [Section 7.1(8)].

If you are not sure whether a consignment of dangerous goods requires an ERAP, you may call Alberta EDGE at 1-800-272-9600. You can obtain an application to register an ERAP by calling CANUTEC at (613)992-4624.

7. GUIDE FOR DANGEROUS GOODS SHIPPERS

To determine the proper shipping name and/or UN Number, refer to Schedule 1 of the TDG Regulations, which lists regulated dangerous goods by UN Number, or Schedule 3 of the TDG Regulations, which lists regulated dangerous goods alphabetically by shipping name.

STEP 1 – Determine the proper shipping name

The shipper must determine the proper shipping name of the materials according to TDG Regulations, Schedule 1, Column 2.

STEP 2 – Determine the class (and subclass, if any)

Refer to TDG Regulations, Schedule 1, Column 3, and locate the classification and, if any, the subsidiary classification of the product.

STEP 3 – Select the UN Number

Refer to TDG Regulations, Schedule 1, Column 1 and select the UN Number.

STEP 4 – Determine the mode(s) of transport to ultimate destination

- A. As a shipper, you must assure yourself that the shipment complies with various modal requirements.
- B. The modal requirements may affect the following:
 - 1. Packaging
 - 2. Quantity per package
 - 3. Markings
 - 4. Shipping documentation

STEP 5 – Determine and select the proper packaging

- A. Packaging requirements will vary according to modes of transportation.
- B. Some exemptions for packaging may apply. For a full explanation of exemptions refer to Part 1 and Schedule 2 of the TDG Regulations. For example, Section 1.15 (150 kg Gross Mass) and Section 1.17 (Limited Quantities).
- C. If packaged by a prior shipper, make sure the packaging is correct and in proper condition for transportation.

STEP 6 – Prepare the shipping document

- A. The basic requirements for the shipping document include: name and address of the shipper, date, UN number, shipping name, class, packing group, total quantity, 24 hour emergency response telephone number.
- B. Make all entries on the shipping document legible using the information required and in proper order.
- C. For additional requirements, see Part 3 of the TDG Regulations, or read Part 2 of this document.
- D. A copy of the shipping document must be retained for 2 years by the consignor and carrier.

STEP 7 – Select the proper safety marks and apply as required

- A. Refer to the TDG Regulations, Part 4, for required labels or placards.
- B. For a small means of containment (capacity less than or equal to 450 litres), the shipping name and UN number should be printed on the package.
- C. Unless the vehicle is already correctly placarded according to Part 4 of the TDG Regulations, the consignor must provide the required placards.

STEP 8 – Loading, blocking and bracing

If the shipper loads the freight container or transport vehicle, the shipper is responsible for the proper loading, blocking, and bracing of the materials in accordance with the requirements for mode of transport.

8. GUIDE FOR DANGEROUS GOODS CARRIERS

If the shipment is packaged and loaded by the shipper, it may be difficult for the carrier to examine it physically. Therefore, it is very important to carefully review the shipping documents. Always visually inspect the transport vehicle or freight container for leaks or potential problems.

STEP 1 – Determine Employee Qualifications

An employer is required to ensure employees who have any responsibility for handling or transporting of dangerous goods are thoroughly trained. The following suggestions will help to meet this requirement:

- A. Identify all personnel who have dangerous goods handling or transportation responsibility.
- B. Determine training needs. Training for dangerous goods includes the following criteria:
 - a. classification, nature and characteristics of dangerous goods;
 - b. packaging requirements;
 - c. safety marking requirements;
 - d. documentation requirements;
 - e. special precaution requirements;
 - f. reporting requirements;
 - g. emergency action requirements;
 - h. proper equipment use;
 - i. safety equipment use.
- C. Ensure that those needing training receive training specific to their duties.
- D. Issue training certificates to the trained personnel. Specify the aspects of training received.
- E. Maintain records of training for 2 years from the date of expiration of the certificate.
- F. Review training whenever necessary. New training certificates must be issued to trained employees every 3 years. Old training certificates must be retained by the employer for two years after expiry.

STEP 2 – Determine condition of transport vehicle

- A. Ensure that the cargo space is suitable for loading. It should be free of nails and other protruding sharp objects.
- B. Ensure the type of vehicle is suitable for the material to be loaded. It must be in compliance with the Traffic Safety Act.

STEP 3 – Is the shipment acceptable for transport?

- A. Determine if the shipping document is accurate and complete.
- B. Determine the proper placards and UN numbers are displayed if required.
- C. Determine that each package is properly marked and labeled as required.
- D. Determine whether authorized packaging has been used and whether it is in proper condition for transportation.
- E. The freight is adequately blocked and braced to prevent movement and damage in transit.

STEP 4 – Is the shipment to be interlined?

- A. An interlined shipment is one in which the mode of transport will change before the shipment reaches its destination; e.g., from road transport to air transport. Properly prepare the material so the secondary carrier will accept it from you.
- B. Changes in the mode of transport may affect the following requirements
 - 1. packaging;
 - 2. quantity per packaging;
 - 3. marking;
 - 4. labeling;
 - 5. shipping documentation.

STEP 5 – Prior to loading the shipment

- A. Determine documentation matches the shipment.
- B. Check for damaged or leaking packages.
- C. Proper placards and UN numbers are displayed, if required.
- D. Ensure the required documentation is provided to the driver/pilot/conductor/captain.
- E. Avoid loading toxic substances with foodstuffs.

STEP 6 – Incident Reports

The person in charge of the dangerous goods at the time of the incident is responsible to report a dangerous occurrence as defined in Part 8, section 8.1 of the TDG Regulations.

Dangerous Goods Shipping Document for Road Transport on Canadian shipments

CONSIGNOR Name: Address:			DESTINATION (City-Town) Name: Address:			
Name of Carrier		Prepaid <input type="checkbox"/>	Collect <input type="checkbox"/>	Transport Unit Number		
Point of Origin			Shipping Date		Shipper's No.	
REGULATED DANGEROUS GOODS						
UN Number	Shipping Name	Primary Class	Subsidiary Class	Packing Group	Quantity	Packages Requiring Labels
24-Hour Number: _____						
ERAP Reference _____ and Telephone Number _____						
Consignor's Certification						
I hereby declare that the contents of this consignment are fully and accurately described above by the proper shipping name, are properly classified and packaged, have dangerous goods safety marks properly affixed or displayed on them, and are in all respects in proper condition for transport according to the Transportation of Dangerous Goods Regulations.						
Name of Consignor: _____						
Special Instructions						
NON-REGULATED GOODS						
Packages	Description of Articles			Weight		
Received in apparent good order				_____ Consignee's Signature		_____ Shipper's Signature
Received in Apparent Good Order	Driver's Signature			Driver's No.		

Please note that this sample shipping document contains some information that is not required in the TDG Regulations. The additional information reflects current industry practices.
