

Cargo Securement Training

A new Cargo Securement Standard #10, supported by an Alberta regulation, came into effect February 1, 2005. Commercial vehicles registered for more than 4,500 kilograms or designed for carrying 11 or more persons including the driver, must comply with this new legislation. Alberta Transportation has developed this Notice to assist industry in achieving compliance to this new standard. The following is a list of organizations in Alberta that have informed the department that they offer a cargo securement training course.

This listing is NOT an endorsement by Alberta Transportation of the training or of the training provider. It is only intended as a guide to assist industry with achieving compliance and protecting the safety of the public and the carrier's employees.
