PROJECT: _____ **WAC/JOB NO.:** _____

CONTRACTOR: _____ **CONTRACT NO.:** _____

CONSULTANT: _____ **REGION:** _____

TYPE OF WORK: _____

		Checked		Corrections		
		Completed By	Date	Req'd	Completed By	Date
✓	**1. EXCAVATION MEASUREMENTS (attach detailed list if required)**					
	- All excavated material has been measured and included					
	- DTM's, cross-sections, etc. are done correctly					
	- Final Cross-Sections have been reviewed for errors					
	- Are closures on cross sections acceptable					
	- Areas calculated correctly					
	- Intervals of Check: (Every____Stations, etc.)					
	- Volumes calculated correctly; includes all point quantities (i.e. approaches, piles, culverts)					
	- Overhaul - completed for all required materials - point loads and dead hauls included - diagrams and calculations are correct					
	- Borrow Pits: diagrams and calculations checked					
	2. BID ITEMS					
	- Method of measurements agree with Contract Specifications. (e.g. topsoil placement, seeding, cold milling)					
	- All field measurements included					
	- All calculations included and traceable					
	- Detailed Spot Checks on calculations, subtotals and totals performed					
	- Quantity transfer from final details correct					
	- Final Detail format as per Contract Administration Manual					
	- Each bid item is included on a "Bid Item Details" sheet					
	3. PENALTY/BONUS CALCULATIONS					
	- Method of calculations agrees with Contract Specifications					
	- Quantity transfer from final details correct					
	4. SITE OCCUPANCY					
	- Site Occupancy days recorded and summarized weekly					
	- Assessment agrees with Contract Specifications					
	5. EXTRA WORK and CONTRACT COST OVERRUNS					
	- In accordance with Contract Specifications					
	- All work has been approved at the appropriate level					
	- Contract Cost Overrun Completed (if required)					
	6. GRAND SUMMARY and FINAL ESTIMATE					
	- Quantity transfer from final details correct					
	- Unit Prices are correct					
	- Completed for each project/WAC					
	- Contract log completed					
	7. SUMMARY OF FINAL DETAILS (all items indicated have been completed where applicable)					
	- Summary of Final Details Submitted to the Department					
	- Summary of Final Details Retained by the Consultant					

Note:
1. For larger combined jobs, use separate sheets for each project.
2. Frequency of spot checks to be increased if many errors are found

Project: _____ **WAC/Job:** _____

CONTRACTOR: _____ **Contract No.:** _____

CONSULTANT: _____ **Region:** _____

		Checked		Corrections		
		Completed By	Date	Req'd	Completed By	Date
✓	**1. CROSS SECTIONS**					
	- Are all stations present? (check volumes report)					
	- Are all applicable surfaces present? (check XNG files & Panel 2)					
	- Survey data checked for errors? (H.I. values, rod reading errors)					
	- Are the surface to surface tie-ins correct? (e.g. vertical vs. sloped)					
	- Are common and borrow separated at right-of-way boundaries?					
	- Digital Terrain Modeling done correctly?					
	- Are cross sections extracted correctly? (e.g. correct alignment used, etc.)					
	2. AREAS					
	- Are the area parameters set correctly? (Panel 2)					
	- Are the areas coloured correctly? (no overlaps or doubling)					
	- Is the Undercut calculated correctly?					
	- Are the areas matching the volumes report? (random check)					
	- Do the area values seem reasonable?					
	3. VOLUMES					
	- Volume reports completed? (main align., borrow pits, R/A's, etc.)					
	- Are all "Point Volumes" included & documented? (apps., piles, culverts, etc.)					
	- Are volumes summarized and totaled?					
	- Are "Remove & Replace" quantities accounted for? (B.T.S. , Topsoil, culverts, etc. - doubled or measured twice)					
	- Are quantities for Channel Exc. measured & calculated correctly?					
	4. OVERHAUL					
	- Are the "Code Point" files correct? (station, quantity, dead haul, etc.)					
	- Are the "Haul Quantity" files correct?					
	- Are all "Accumulated Sum" files correct?					
	- Are the Overhaul summaries correct?					
	- Are all Overhaul diagrams correct?					
	5. FINAL DETAILS SHEETS					
	- Are numbers correctly transferred from original data?					
	- Are all items measured and recorded (i.e. field books)?					
	- Are all calculations and totals correct?					
	- Are Final Details completed as per Section 5?					
	6. BORROW PITS					
	- Are borrow Pits plans completed and correct?					
	- Is Information for Reclamation Certificates included?					
	- Are the Pre-Construction Assessments included?					

NOTE: This checklist is intended to be a guide and/or a reminder. It has been developed with EMXS in mind, however the logical steps can be applied to other earthwork software packages. The checking process requires more detail than indicated above and it is the responsibility of the checker to ensure the final details are thoroughly checked.

CONSULTANT: _____ **Region:** _____

		Checked		Corrections		
		Completed By	**Date**	**Req'd**	**Completed By**	**Date**
✓	**1. ORIGINAL DATA**					
	- Scale Sheet totals are correctly calculated					
	- Checkers' books are summed and match the scale sheets					
	- Field Books/Contract Data Entry Records are summed correctly					
	- Adequate amount of decimal places for accuracy					
	- Lab worksheets agree with Daily Paving reports (available for reference)					
	- Provide Weigh Bills for asphalt items (e.g. prime coat); units correct					
	- Smoothness data for all locations is correct & available for reference					
	- Bid items accounted for and have field measurements (in field books)					
	2. CALCULATION SHEETS					
	- Final Details - ACP EPS Projects, calculations checked					
	- EPS Gradation Price Adjustments, confirm rates and calculations					
	- Smoothness Summaries: confirm rates and calculations					
	- Areas of Localized Roughness: confirm rates and calculations					
	- Segregation Rating Sheets: confirm rates and calculations					
	3. DAILY PAVING REPORTS					
	- Mix Design targets correct & corresponds with Mix Design changes					
	- Consultant's Mix Design reviews recorded & attached					
	- Compaction percentage calculated correctly					
	- Appeals are included and applied; agrees with Specs. (if applicable)					
	- Calculations and averages are correct					
	- Rounding of numbers is in accordance with ATT-70					
	4. FINAL DETAILS ACP (EPS) PROJECTS (Summary Sheets)					
	- Quantity and Unit Price Adjustments transferred correctly					
	- Unit Price Adjustments correct and agree with Contract Specs.					
	- Smoothness adjustment in accordance with Contract Specs.					
	- Segregation adjustment in accordance with Contract Specs.					
	- Calculations, sub-totals and totals are correct					
	5. FINAL DETAILS SHEETS					
	- Numbers correctly transferred from original data					
	- Calculations are shown; calculations, sub-totals and totals are correct					
	- Haul Distribution Sheets are complete and correct					
	- Final Details completed as per Contract Administration Manual					
	6. DOCUMENTATION					
	- Appeal Letters from the Contractor included					
	- Supply of Aggregate details and summary provided by class/type					
	- Summary of Bonuses & Penalties					
	- Grand Summary: Quantities by Project/WAC					
	- Details of Widths & Thicknesses: - Thicknesses match checker's book tonnage distribution - All changes in widths, thickness are shown and labeled - km stationing shown					
	- Signatures: all documentation requiring signatures is signed					

NOTE: This checklist is intended to be a guide and/or a reminder. The checking process requires more details than indicated above and it is the responsibility of the checker to ensure the final details are thoroughly checked.

	HIGHLY ORGANIC SOILS	Pt	Peat and other highly organic soils.

COMMENTS :

NOTE : Send form within one month of project completion to :

E-mail : trans.constructqa@gov.ab.ca

Guidelines *for reporting the predominant soil type*

The Pavement Management System only accepts one soil type per roadway segment.

Reporting of soil types does not need to be divided into segments of less than 0.5 km.

Segments with more than one soil type should report only the predominant soil type for the upper portion of the embankment.

Show stationing at each point where width of subgrade changes.

Data required only for main alignment new construction (i.e. not for added on climbing lanes)
