

1.1 WORK IN THE VICINITY OF UTILITIES

1.1.1 General

The Contractor's attention is drawn to Section 1.2.49, Safeguarding Utility Installations, of the General Specifications.

Additional specific requirements for work in the vicinity of utilities and coordination with the owners and/or operators are listed under the particular utility.

The known utility companies, owners and operators and their representatives are as follows:

(Insert names, addresses and phone numbers of utilities and contact persons.)

1.1.2 Telephone Facilities

TELUS proposes to carry out the required relocation of their facilities concurrently with the construction operations.

TELUS has advised that in those areas where it is not immediately feasible to relocate the buried cable to the final location, they propose to temporarily place a cable along the right-of-way boundary and bury it upon completion of grading operations.

All work will be arranged and coordinated at field level through _____ at Telephone No. _____ in _____. TELUS will require a minimum of ___ weeks advance notice prior to commencing work.

1.1.3 Power Lines

1.1.3.1 General

_____ (_____) has advised that they have power facilities within the limits of this project, and alterations to their facilities will be carried out concurrently with the grading operations. Therefore, the Contractor shall maintain close liaison with _____ and schedule his operations accordingly.

All work shall be arranged and coordinated with _____ at Telephone No. _
_____ in _____.
