

NE Anthony Henday: Sherwood Park Freeway interchange

Currently under construction

- New westbound Sherwood Park Freeway overpass and access ramps
- New eastbound to northbound directional ramp
- In June 2013, two weekend closures of Sherwood Park Freeway took place to accommodate demolitions of the 76 Ave. bridge and the westbound bridge over Anthony Henday Drive

Traffic considerations

- Current detour will be in place until late 2014, when the new westbound bridge will be opened to carry all four lanes of traffic
- New eastbound bridge will be completed by fall 2016
- 76 Avenue access closed permanently, to be replaced in 2016 with expanded 17 Street interchange

Open to the public in 2016

- Larger, safer interchange with free-flow traffic in all directions
- Two new bridges, each carrying three lanes of Sherwood Park Freeway traffic
- New eastbound to northbound flyover
- New lower speed collector roads to ensure safer merging
- Anthony Henday Drive increases from four to six lanes total
