

## BACKGROUND

- Original functional plan done by Infrastructure Systems Ltd. in July 2000.
- “Parclo A” interchange layout was recommended (*see below*).
- Earth works for bridge abutments, loops and ramps were built in 2003-2004.
- Updated new traffic data (year 2007) was used to project future conditions.
- Functional Review to apply the most current design criteria for AHD interchanges.
- Lane requirements were determined at year 2011 and at “Ultimate” stages.

“Parclo A” interchange
