

FREQUENTLY ASKED QUESTIONS

Question. What is the schedule for completion of the interchange?

Answer. The design is scheduled for completion in the Summer of 2008. The construction will be undertaken at a later date. The Province's goal is to have the entire ring road completed by 2015.

Question. How close will the road be to our property?

Answer. The initial stage will be placed on the existing fills with minor adjustments.

Question. How much will this cost?

Answer. The preliminary construction cost estimate is 25-30 million dollars.

Question. What about the environment?

Answer. Because the option recommended by MMM will remain on the existing fills, there will be no disturbance of lands outside of the Anthony Henday Drive corridor. The Province directed MMM to avoid the wetlands southeast of the interchange.

Question. What if I have other questions about the project?

Answer. Please talk to the representatives at the open house. If you have other questions, please see the contact information on the handouts attached to the comment forms.

Question. How can we keep up to date with the project's progress?

Answer. The handout attached to the comment form has the Alberta Infrastructure and Transportation website on it.
