Alberta Transportation Southern Region Geohazard Assessment Site S22 – "S" Curve Slide, Highway 762:02 CG25332.200 October 2010

**Photo S22-1** – Looking northbound from the east end of the site. The road surface has recently been milled which makes it difficult to compare the condition at the time of the inspection to past observations. The pattern and extent of the cracks in the road surface are similar to what was noted in 2009.

**Photo S22-2** – Looking northbound from the centre of the site.
