**Deerfoot Trail / Glenmore Trail Interchange  
Functional Planning Study**

---

The ultimate goal is to develop the Deerfoot Trail / Glenmore Trail interchange as a freeway to freeway connection that allows for the safe, efficient flow of traffic, thus improving its function as a key part of the Province's north-south trade corridor and the City's skeletal road network. The end product of the study will be a functional roadway design with an implementation strategy for near- and long-term improvements and staging strategies

1) What aspects of the **Stage 1** design proposal presented at this open house do you support?
