

Highway 22X (88 Street SE) and Stoney Trail SE

(Photo taken September 24, 2013)

The new interchange connects Stoney Trail SE to Highway 22X (88 Street SE) just east of the City of Calgary. The interchange itself consists of a total of four bridge structures and allows Stoney Trail SE traffic to free-flow eastbound to northbound and from southbound to westbound beneath the Highway 22X (88 Street SE) interchange structures. The new interchange provides all motorists, including commercial drivers, with improved access to one of Alberta's important east-west roadways, Highway 22X.
