Carseland-Bow River Headworks System Rehabilitation

Travers Inlet Structure

The site is located in Section 15, Township 15, Range 21, West of the 4th Meridian, approximately 40 km southeast of Vulcan, Alberta.

The work involves constructing a 23 X 99 meter (approx.) concrete structure forming the inlet to the Travers Reservoir. The work includes controls systems, a temporary well-point pumping system and armouring of reservoir banks.

Tenders may be obtained on or after **February 25, 2008, 8:15 am to 12:00 noon and 1:00 to 4:30 pm.**

Calgary Bow River Weir Project

THE WORK: Involves modifying an existing concrete weir (constructed in 1974) across the Bow River to improve water safety and fish passage. The work includes structural concrete, riprap and boulders with fibre-reinforced concrete fill, to modify the weir and shape 2 channels extending up to 300m downstream. Care of water measures and turbidity management are required for the 3-year construction period.
Southern Region - Lethbridge

Carseland-Bow River Headworks System Rehabilitation
 McGregor Reservoir - South Dam Outlet System
 West Valley Slope Re-vegetation

The site is located in Section 21, Township 15, Range 21, West of the 4th Meridian, approximately 40 km southeast of Vulcan, Alberta.

The work involves re-vegetation of a previously excavated slope, including mowing, stripping excavating and stockpiling, topsoil backfilling from Minister's nearby stockpile, installing compost blanket and sock berms, and seeding.
