PILE CUTOFF ELEVATIONS

- TO OBTAIN CUT OFF ELEVATIONS, SUBTRACT DIFFERENTIALS FOR GRADE GIVEN IN TABLE (A) FROM THE ROADWAY PROFILE ELEVATIONS AT & CROWN AND AT & PIER OR & ABUTMENT.
- FOR BRIDGES ON SKEWS, SUBTRACT OR ADD THE ADDITIONAL AMOUNTS GIVEN IN TABLE (B).

CLEAR ROADWAY		GRADE %	PILE I	PILE 2	PILE 3	PILE 4	PILE 5

GENERAL NOTES

- ALL SUBSTRUCTURE DETAILS AS GIVEN ON DRAWINGS S-1420 AND S-1421 SHALL APPLY EXCEPT AS MODIFIED OR SUBSTITUTED ON THIS DRAWING.
- . ALL DIMENSIONS GIVEN IN MILLIMETRES UNLESS
- DESIGN: LIVE LOAD CSA S6-M78, MS230
- ALL REQUIREMENTS OF THE CURRENT BRIDGE BRANCH SPECIFICATION FOR THE SUPPLY OF STRUCTURAL STEEL FOR BRIDGES (SPEC NO B-187M) SHALL BE MET.
- ALL STEEL SHALL CONFORM TO THE REQUIREMENTS OF ASTM A36 OR CSA G40.2IM-300W.
- ▲ ALL WELDING SHALL CONFORM TO CURRENT AWS SPECIFICATION D1.5.
 - CAPS AND EXTERIOR SURFACES OF CAPITALS SHALL BE BLAST CLEANED AND SHOP PAINTED WITH ONE PRIME COAT AND TWO FINISH COATS. CLEANING TO BE APPROVED BY THE ENGINEER PRIOR TO PAINTING.

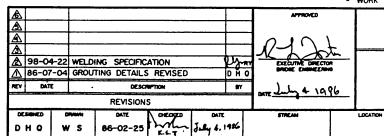

CONSTRUCTION PROCEDURE FOR NEW SUBSTRUCTURES

- I. PILES TO BE CUT OFF SQUARE AT REQUIRED ELEVATIONS;
- 2. PLACE SUITABLY SIZED CAPITALS (TRIM PILE TOPS IF NECESSARY): POSITION OPTIMALLY TO ALLOW FOR TILTING OF PINTLES RELATIVE TO PILES FOR CROWN AND GRADE:
- 3. PLACE CAP AND TILT LONGITUDINALLY TO SUIT GRADE:
- 4. DRAW PILES INTO ALIGNMENT: WELD CAPITAL TO CAP:
- 5. ATTACH PIER SWAY BRACING:
- 6. PRESSURE GROUT CAPITALS TO PILE;
- 7. PLACE NEOPRENE BEARING STRIP:
- 8. ERECT GIRDERS; DRILL HOLES THROUGH NEOPRENE STRIP AND TOP FLANGE AND INSTALL DOWELS;
- 9. CLEAN AND FIELD PAINT WELD-DAMAGED PAINTED AREAS.

PROCEDURE MODIFICATIONS FOR REPLACING EXISTING TIMBER CAPS

- 1. PREFABRICATED CAPS MUST BE CHECKED FOR DIMENSIONAL SUITABILITY TO MATCH EXISTING PILE LOCATIONS:
- 2. EXISTING DECK CAN BE DISMANTLED OR UNIFORMLY RAISED ONE PIER AT A TIME BY JACKING ON FALSE BENTS TO ALLOW EXISTING PILES TO BE CUT OFF AT THE REQUIRED LOWER ELEVATIONS;
- 3. WHERE A PILE IS TOO SHORT BY REASON OF EXISTING SUBCAPS, INSERT ANOTHER CAPITAL AND WELD ALL AROUND TO LOWER CAPITAL WITH 8 mm FILLET WELD:
- 4. REMAINING PROCEDURE IS SIMILAR TO THAT FOR NEW STRUCTURES.

. WORK THESE DRAWINGS TOGETHER: S-1420. S-1421 AND S-1446
