Forestry Trunk Road bridge approach washed out. Note creek has created a new channel which needs to be re-directed under the bridge.

Forestry Trunk Road bridge approach back filled and repaired for traffic to drive on. Creek has been restored to its original course.

Forestry Trunk Road at bottom of the valley was rebuilt to allow traffic to drive on. Water is still flowing freely along both sides of roadway.

Highway 40 washout repair with a new gravel road surface and slideslope repaired.

Highway 40, temporary bridge detour at Lineham Creek. Note damaged road and missing culvert location in background.

Highway 40, repair work at Storm Creek site where debris from mountain run off plugged culverts and washed road and ditches away.
