|-----------------------|--|------------------|
| H968 Daishowa E. Hill | Used on ditch test section as one of 8 erosion control products. | 2008 |
| | | |

Filtrexx Channel Soxx was used on a test section of a highway ditch where 8 different BMPs were used. A combination of compost and gravel was used to fill the socks. Wood stakes were used to anchor Channel Soxx and there is no sign of ditch erosion or despair. Good grass catch has been noted on both sides of ditch except the ditch bottom where heavy runoff may have slowed down its growth.

Recommendation:

Advance to Proven status

May 2008
