

PRODUCT INSPECTION

Maccaferri MacMat N10	Product ID: 8133-1-13 Initiation Date: November 2004 Expiry: November 2009 Status: Trial Inspected by: F. Cheng On: February 8, 2009
-----------------------	---

Project	Description	Application Date
Tunnel Mountain Road, Banff	Bare backslope re-vegetation	2007
H63 N. of Ft. McMurray	West ditch, south bound lane	2007

A MacMat N10 (3-dimensional) matting was installed on a bare slope in Tunnel Mountain Road. This matting was anchored on the slope with pins. On top of it was applied a thin layer of compost (mixed with grass seeds). Grass was catching in the first few months. The inspection in October 2009 noted a new 3- to 4-inch compost on top of the MacMat N10 and grass catch was thick. As well, there is no erosion on the slope or in the ditch.

Recommendation:
Advance to Proven status.
