

Road Test Services for All Drivers

Road testing services are provided through the registry agent network. Road tests are conducted by licensed driver examiners, with scheduling arranged by the registry agents.

Road test fees are determined jointly by the registry agent and driver examiner, and can vary by location. The government receives a fixed amount of \$5 per test, with the agent and examiner portions added to this.

It is recommended that you compare the services offered at various registries including scheduling, fees, cancellation and refund policies, and methods of payment.

For information regarding requirements for a road test, contact a registry agent. Agents will provide a road test information sheet that outlines a number of considerations including client eligibility, vehicle requirements, required documents, fees and cancellation/no-show policies.

To locate a registry agent, use this link for road test locations:
