Phone: 1-888-252-1638
e-mail: info@parklandgeo.com

The QA appeal process for paving projects has not changed from past years and is described in section 3.6.9 QA Appeals of the Engineering Consulting Guidelines – Volume 2.

Forms should be completed by the project consultant and appeal consultant, and are located in APPENDIX B - Highway Construction Administration Forms of that guideline.

[B.15 Appeal Initialization Form](#)

[B.16 Appeal Test Results](#)

The hiring and payment for the testing services of the appeal consultant is handled through the Project Administrators office. Depending upon the outcome of the appeal testing, the contractor may be assessed for the testing costs at a set amount as listed in Specification 3.50.4.9 Appeal ... Testing.

Larry Dombrosky, Roadway Construction Standards Tech, is responsible for the Department's appeal testing program.

Please direct any questions or concerns you may have regarding this program to him at the Technical Standards Branch in the Twin Atria Bldg at (780) 415-1010.
