Retro readings (15M) yellow edge line: 115, 112, 128, 124, 105, 101, 117, 101, 122, 120 – **Average: 115Mcd**

Retro readings (15M) white skip line: – **Average: 131Mcd**

The Pathfinder Marking Systems retro-reflectivity is good after one winter season at this location. These markings look very good and are providing excellent delineation. No debonding of the Pathfinder markings was observed.

Observation and retro-reflective readings should be taken in the spring of 2010 to determine the longer term durability of these markings.
